Management and Maintenance of the public greenery

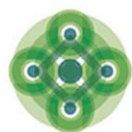

Roberto Diolaiti - 6 ottobre 2016

BOLOGNA AND ITS MAIN FEATURES

- Bologna is the capital town of the Region Emilia Romagna .
- it is a metropolitan city, with approx. 385.000 inhabitants.
- The municipal territory stretches on a total area of 140.846 sq.m.
- It's a major rail and highway junction in Italy, with a fast-growing, international Airport as well.
- Strong presence of small-medium enterprises in the local economic fabric.
- The main environmental problems are given by the air quality and the greenhouse effect at a local level.

THE SERVICE CONTRACT

The ordinary and extraordinary maintenance of the public green areas of Bologna is mostly provided through a special tender contract signed between the Municipality and “Global Service Verde”, a temporary consortium (ATI) of 4 cooperative companies ([Cooperativa l’Operosa](#), [Cooperativa Agri2000](#), [Consorzio SIC](#) e [Avola Coop](#)). The contract includes services for both ordinary and customised services.

Beside the service contract with GSV, the management of the greenery is also supported by other instruments, like special agreements with individual citizens or other organizations as associations of citizens, social cooperatives, NGO’s - that are a very interesting opportunity for the city.

Moreover, some green areas belonging to the street furniture are subject to sponsoring by private companies, that have taken up their maintenance and take care of their look and ornament.
